

APPLICATION FOR REVIEW OF ENCROACHMENT AND/OR RELEASE OF EASEMENT

Gainesville Regional Utilities, Real Estate Division, PO Box 147117, MS E3E, Gainesville, FL 32614-7117

GENERAL INFORMATION

Periodically, when property is bought or sold, encroachments on easements are discovered through a survey. Since encroachments create a cloud on the title, GRU is often requested to release all or a portion of its interest in the encroached utility easement in order to clear the title.

On rare occasions when a release of easement, or facility relocation isn't feasible, there may be a need to work out an accommodation in the form of a Hold Harmless Agreement that allows an encroachment in our easement. Under this Agreement, the owner of the property will be held liable for any repairs or removal of the structure that results from normal operation and maintenance or emergency repair of our utilities. NOTE: This accommodation is only available for commercial properties.

The process of reviewing an existing or proposed encroachment and/or releasing all or part of easements can be problematic and time consuming. Therefore, GRU established the Review of Encroachment procedure in an effort to recover the cost associated with research, review, utility locations and preparation of legal documents. Instead of asking all of the rate payers to bear the cost of these services, the cost is covered by the individual or company benefiting from requesting the review and/or release of the encroachment.

APPLICATION INSTRUCTIONS

In order to begin GRU's process for reviewing encroachments and/or handling requests to release our interest in a utility easement, the attached Application for Review of Encroachment and/or Release of Easement must be filled out and turned in to the GRU Real Estate Division, along with a survey showing the encroachment in relation to the affected easement and an application fee of \$300 per review/easement. Failure to include any of the requested information may result in your application being returned. The application and required documentation may be sent electronically to the Real Estate division, but electronic payment of the application fee is not available at this time.

REVIEW PROCESS

Upon receipt of the application and required documentation, all GRU departments must review each request to determine the location and/or existence of electric, water, sanitary sewer, gas or communication utilities facilities.

Within ten (10) working days of receipt of your request, you will be notified of approval or denial.

If your request is approved, the GRU Real Estate Division will prepare all necessary release documents for approval and signature. However, it is the applicant's responsibility to provide a legal description and sketch of the area to be released, which must be prepared by a registered land surveyor.

If utility relocation is required as a result of property development or encroachments discovered through this process, relocation costs will be at the applicant's expense. This process will allow GRU to continue to provide safe and reliable service to its customers.

QUESTIONS

Please feel free to contact the Real Estate Division at 334-3400 ext. 1221 with questions or comments regarding the Review of Encroachment process.
