Subject: Notification that Development of Alternative Capacity is Technically Infeasible

Per the requirement of §257.106(i)(14), and with respect to the surface impoundment system located at GRU's Deerhaven Generating Station, this is a notification that GRU intends to comply with the site-specific alternative to initiation of closure due to development of alternative capacity infeasible as required by §257.103(f)(1)(ix)(A) and has submitted the required demonstration to US EPA. A copy of this notification, along with a copy of the demonstration, will be placed in the operating record according to the requirement of §257.103(f)(1)(ix)(A) and §257.105(i)(14), and a copy of the notification will be posted to GRU's publicly-accessible internet site within 30 days according to the requirement of §257.107(i)(14).

Thank you,
